

1st Ever Bonus Dividend Declared!

Due to the exceptional year the credit union had in 2018, the Board of Directors of Auburn Community Federal Credit Union has declared an end of year bonus dividend and loan interest rebate in the amount of \$100,000!

The bonus dividend was calculated based on the year-to-date interest you paid on your loans and the year-to-date dividends you received on your deposits to those members in good standing*

The amount of the bonus dividend you receive is based on how much business you conduct with the credit union. The same percentage is used for calculating the bonus dividend on both the shares and loans.

The more you save with the credit union during the year means the more dividends you will earn over the course of the year. The more you borrow from the credit union allows us to earn the interest needed to pay the dividends on your share accounts plus cover our operational expenses.

It should be noted that the Board does not have to declare a bonus dividend and is not required to do so, and it is never guaranteed for future years. The bonus dividend was declared in 2018 due to the growth in use of our loan products and share products resulting in a profitable year.

The Board of Directors of Auburn Community FCU would like to thank our members for making 2018 a great year enabling them to declare a bonus dividend and share our success back with them!

*A member is not in good standing with the credit union and is ineligible to receive the bonus dividend if they have caused the credit union a loss due to loan and share charge offs, or having delinquent loans. VISA credit card loans are ineligible for the bonus dividend. Primary share accounts closed during the year are ineligible for the bonus dividend.
